Our Mission

Our mission is to provide GREEN SOLUTIONS to our customers innovating and educating through supply of sustainable eco-friendly products that provide ONE SMALL CHANGE from every customer, in turn making ONE BIG DIFFERENCE to our planet.

How We Are Achieving This

Food Safe for Human Contact

Bygreen is HACCP certified (Certificate No SQI 4670) through SCI QUAL INTERNATIONAL. HACCP (Hazard Analysis Critical Control Point) is a universally recognised system for reviewing the operation and ensuring that pro-active consideration is given to each process and there is focus on identifying any hazard that might exist in relation to Bygreen’s products and supply processes.

Responsibly Sourced Wood and Paper

At Bygreen we wish to help abolish illegal logging and ensure the products we supply are sustainable. Certified with FSC® chain of custody (Certificate No SA-COC-006807) guarantees our customers that the FSC®-labelled product we sell has come from a forest and supply chain that is managed responsibly. Only items marked are FSC® certified.

Packaging Responsibly

APCO – The Australian Packaging Covenant Organisation is a co-regulator and not for profit organisation that is partnering with government and industry to help reduce the impact of packaging within Australia. They are dedicated to promoting sustainable packaging including sustainable design, recycling initiatives and waste and landfill reduction.

As an APCO (Brand Owner) Member, Bygreen has support through the entire process as they provide the framework and resources to increase our packaging sustainability along the entire supply chain from design, distribution, retail and importantly, recovery.

Bygreen’s Waste Management Heirachy

In 2018 Australia established the 2025 National Packaging Targets to create a new sustainable pathway for the way we manage packaging in Australia. The four targets, to be achieved by 2025, are:

- 100% reusable, recyclable or compostable packaging
- 70% of plastic packaging being recycled or composted
- 30% of average recycled content included in packaging
- The phase out of problematic and unnecessary single-use plastics packaging.

Sourced from APCO 2025 National Packaging Targets
**Freight Policy**

ORDERS PLACED BEFORE 12 NOON, WILL BE PICKED THE SAME DAY, AND DISPATCHED THE NEXT DAY
ONCE YOUR ORDER IS RECEIVED, WE WILL ENTER THE ORDER AND EMAIL YOU A CONFIRMATION

PLEASE CHECK THIS CONFIRMATION AND REPLY BY EMAIL OR PHONE (ASAP) IF ANY CHANGES ARE TO BE MADE TO THE ORDER. IF WE HAVE NOT HAD ANY REPLY - WE WILL ASSUME THE ORDER IS CORRECT AND WE WILL PROCEED TO PICK

YOUR ORDER WILL BE PICKED & PACKED, INVOICE WILL BE EMAILED & GOODS WILL BE DISPATCHED NEXT DAY

**EMAIL ORDERS TO - SALES@BYGREEN.COM.AU**

- Match Sticks

- Wooden Cutlery
- Palm Leaf Plates and Bowls
A Plastic Straw with the additive “Reverte®” which alters the molecular structure of the plastic. Approximate lifespan of 18 months after its useful life.

After an initial 48 hours of sunlight, and exposure to oxygen, the straw will begin to degrade, eventually become brittle, slowly breaking down to where it can be then be attacked in a micro-biological form, eventually degrading to CO2 and Biomass.

If this straw finds its way into an open environment, this is where its degradable properties work well. Our OXO-BIO Eco-Straws meet standards for exposing and testing plastics that degrade by a combination of Oxidisation and Biodegradation.

These straws take longer to break down compared to PLA or Paper and therefore cannot be claimed as a commercially compostable straw, however once fully broken down, meets the same eco-toxicity standards as Tier 3 - Ecotoxicity in the standard EN13432. The plastic, now biomass and CO2 poses no threat to the earth, once fully broken down.

- This covers - Tier 1 – Degradability,
  - Tier 2 – Biodegradability,
  - Tier 3 – Eco-toxicity EN13432 – Ecotoxicity (Only);
- USA and EU FDA approvals For Plastics coming into contact with Food.

Prices as at September 2020. All prices exclude GST and are subject to change without notice. Prices do not include freight see freight policy for FIS terms.
PLA STRAWS
Made from plants not plastic

A great alternative to plastic straws, made from plants (PLA) Poly Lactic Acid.

A compostable and biodegradable solution in an industrial composting facility, PLA straws may offer some users a better touch and feel than paper straws.

We are proud to offer a range of straws in 3 great colours including an “Aussie First” PLA Spoon Straws. There is now a compostable solution for the humble spoon straw, only available from Bygreen.

From the straight drinking straw in a variety of bore sizes, flexi straws and now a spoon straw, Bygreen offers the complete range.
** Prices as at September 2020. All prices exclude GST and are subject to change without notice. Prices do not include freight see freight policy for FIS terms. **

**AUSSIE FIRST COMPOSTABLE PLA SPOON STRAW**
Our paper straws are made from a premium 3 ply food grade paper with no waxes, and only 0.6% food grade glue.

Made up of natural cellulose fibres that can be universally considered compostable and biodegradable.

Lab test results meet a pass for Council of Europe Resolution AP (2002) test for Heavy Metals and Chemicals, LFGB certification and also to FDA standards.

Made in a factory holding BSCI certification, to the highest standards including UV pasteurized before final packing.

Paper straws would be best considered for safety of our marine environment, as Plastic, Oxo-Bio, and even PLA still pose a threat to marine animals if they unfortunately enter this environment due to irresponsible humans, along with plastic bags, plastic and glass bottles, and other rubbish.

This product is made of material from well managed, FSC®-certified forests and other controlled sources.

Prices as at September 2020. All prices exclude GST and are subject to change without notice. Prices do not include freight see freight policy for FIS terms.
Imagine a world with only ONE TREE.....

As the name suggests, we are very proud our “ONE TREE” products are made of material from well managed FSC® certified forests.

Made from natural timbers and bamboo “ONE TREE” products can be returned to the earth.

Sourced from sustainable forests, we will ensure

Palm Leaf Tableware

**Sustainable, Beautiful, Energy Efficient and Food Safe**

Sourced from Areca Nut Plantations, Areca trees shed roughly 8 to 10 leaves per year. The fallen leaves are taken to the factory where they are washed under high pressure spring water. 80% of water used to clean the leaves is diverted back into production processes for reuse.

The shaping process involves the leaf pressed and heated to 180° C (also doubles as heat sterilization).

The pressed leaves are then checked, sent for edging and UV sterilization. The offcuts are used to make smaller bowls, so there is very little waste. Final scraps are used as compost to fertilize the same trees they fell from.

The tableware is then treated just prior to packaging using a Photohydroionization process. This non penetrating chemical free, ionizing UV radiation is a very effective food grade sanitation method.

**Characteristics**

- Palm leaf plates/bowls/platters are safe for Hot or Cold Liquids, do not go soggy with hot liquids, are strong and are easy to hold with the natural insulation of the leaf.
- Microwaveable – up to 2 mins
- Convention Oven at 180 degrees for up to 40mins – You can actually bake in them.
- So you can heat and serve.
- There is no taste transfer to food from the Palm Leaf
- Once Used – Simply return the plate to the earth as nature intended – 100% organic palm leaf plates are compostable and biodegradable.

Labels designed not to run so they stay clean and bright after many refills.

The approach is simple: "because good planets are hard to find," green addict believes in cherishing, honouring and preserving THIS one.

Dedicated to providing the absolute purest eco-friendly cleaning and household products free of:
- parabens
- sulphates
- synthetic dyes
- fragrances or preservatives
- palm oil petrochemicals.

The colour-coded range is designed for your convenience and is a simple solution for all your home or commercial cleaning requirements.

For sustainability, the packaging is fully recyclable.
**HERE THERE & EVERYWHERE**

GO GREEN WITH GO GREEN REUSABLE CUPS. Join the many who are taking their reusable cups with them to their favourite coffee shop rather than purchasing a takeaway cup and join the reusable revolution.

GO GREEN WITH GO GREEN REUSABLE DRINK BOTTLES. Australia has some of the most beautiful beaches in the world. We’d like to see them stay that way. To do this we need to help reduce plastic waste that ends up in our waterways. Join us in our mission by using reusable water bottles and join the reusable revolution.
