DID YOU KNOW?

Australians use 10 million plastic straws and 7 million plastic utensils every day.

Around 84% of the 2.5 million tonnes of plastic we produce each year goes to landfill.

More than 75% of rubbish on Australian beaches is made of plastic.

So why does Australia continue to make and sell so much plastic?

Global change needs to start at home, so we've decided to stop adding to the problem and switch to eco-friendly paper straws!

- ✓ Sourced from natural materials
- ✓ FSC certified
- ✓ Strong, durable and high-quality
- ✓ Available in 3 & 4 Ply

Sustainable products get better every day, and we add them to our product range when we find them.

At Bygreen, we're becoming more responsible in the products we source and sell. And we encourage our customers and distributors to do the same – because it's the right thing to do.
